Subject: Microsoft Settlement

Two federal courts have declared that Microsoft is an illegal and anticompetitive trust and in violation of the Sherman Act. Microsoft continues to extend its anticompetitive behavior with the introduction of its .NET initiative, Passport and other information-hoarding schemes, and the integration of such technologies with Windows XP.

The currently proposed settlement is an insufficient remedy. I urge the Department of Justice to abandon the settlement in favor of one which addresses the problems outlined in the original Findings of Fact.
